

Name _____ Hour _____

Solving Systems with Substitution

DAY 2

Solve the system with substitution.

1. $y = 6x - 11$
 $-2x - 3y = -7$

2. $2x - 3y = -1$
 $y = x - 1$

3. $-3x + 3y = 4$
 $y = 3 + x$

4. $y = 6$
 $x + 2y = 10$

5. $y = 20 - 2x$
 $6x - 5y = 12$

6. $2x + 8y = 6$
 $x = -4y + 3$

Name _____ Hour _____

7. $q + p = 8$
 $q = 6$

8. $y = 2x + 1$
 $3y - 6x = 3$

9. $10x - 5y = 25$
 $y = 2x + 6$
